MOBILE ASPECTS

Unleash the productivity of your healthcare workforce

UHF Handheld Scanners

Take Inventory Intelligence Anywhere

UHF handheld scanners enable mobile, rapid inventory scans, helping staff capture more items in less time. Faster scanning makes routine inventory checks easier and more efficient.

- **Rapid cycle counts**
  Count inventory in a fraction of the time.
- **Inventory anywhere**
  Stockrooms • Shelves • Carts • Procedure Areas
- **Locate discrepancies**
  Identify missing, misplaced & unexpected inventory.

Less time counting.
More confidence in your inventory.
Scan up to 1,000 items per minute.

Powered by UHF Technology

Next-generation RFID technology designed to make inventory management faster and more efficient. UHF enables faster scanning while reducing time spent on manual inventory tasks.

UHF technology extends intelligent inventory management across cabinets, mobile carts, and handheld devices, creating a connected inventory ecosystem throughout the hospital.

MOBILE ASPECTS

Unleash the productivity of your healthcare workforce

Priced for All Hospitals

Our convenient pricing models ensures feasability and high return-on-investment for hospitals of all sizes - ranging from smaller, community hospitals to larger, enterprise health systems.

Designed to Work with Your Existing Tech

Our handheld scanner integrate seamlessly with the systems your hospital is already using - including cabinets, stockrooms, carts, and procedure areas. Additionally, our scanners' technology connects directly to your EHR system, such as Epic.

Proven Performance

15x FASTER than typical, manual workflows
1,000 ITEMS scanned per minute, effortlessly and accurately
90%+ REDUCTION in inventory reconciliation times
